February 13, 2017

Dear Applicant:

RE: E4803 (35-12099) <sup>1</sup>/<sub>2</sub> E1273  
EXPIRATION DATE: August 13, 2017

Your application to replace an existing well evidenced by E4803 (35-12099), <sup>1</sup>/<sub>2</sub> E1273 is hereby APPROVED. You currently have a right to divert water from the well to be replaced, which is located at a point:

South 2800 feet, West 1200 feet, from the NE Corner, Sec 01, Town 7N, Range 1E, SLB&M.

The drilling of a new well for the purpose of securing a normal water supply must be completed by a currently licensed Utah water well driller and must be accomplished with respect to the following conditions:

- 1) The replacement well MUST be drilled within a 150 foot radius of the existing well at the location described in the replacement application, which is:

South 2720 feet, West 1145 feet, from the NE Corner, Sec 01, Town 7N, Range 1E, SLB&M.

- 2) No more water can be diverted and beneficially used from the new well than has been previously allowed under valid water rights referencing the old well.
- 3) The driller MUST permanently abandon the well being replaced (as per State of Utah Administrative Code, R655-4-14) before the drill rig is removed from the site.
- 4) The new well MUST be constructed in compliance with the construction standards described in the Administrative Rules for Water Well Drillers.

Enclosed you will find two postage-paid forms. One is the Driller (START) Card form, which you must give to the licensed driller with whom you contract to drill the new well. The other is the Applicant Card form. It is YOUR RESPONSIBILITY to sign and return this form to this office immediately upon well completion. Your submittal of the APPLICANT Card form will be notice to our office that the work has been completed and will begin the 30-day period in which the driller is to submit a report as required herein. The driller cannot legally commence drilling the new well until you provide him with the Driller (START) Card form, which will then be submitted to our office for verification. You should thoroughly review this letter with the driller so that the instructions and conditions mentioned are understood by all parties.

Sincerely,

 P.E. For  
Ross Hansen, P.E.  
Regional Engineer
